FRETWORK

LACE SALES GUIDELINES

Lace work is sold by the half lineal metre. This means that if you require 3.3metres, for example, you will be charged for 3.5 metres.

Please note that unless you require otherwise, we will cut to size and plug the 'unfinished' end of the lacework. You may if you wish take the un-cut length, cut and plug the un-finished end on-site yourself.

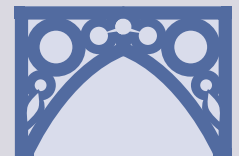

We keep Lace H/R, H,K & Q patterns in stock in 2 & 4 metre lengths.

Please ask if you would like more information.

DOUBLE ENDED BRACKETS

Where you have a small gap between Verandah Posts, for example, you can order double ended brackets to match other ones from our range shown here.

These are made to order and have a three week lead time. Please note that such made to order products require full payment at time of order.

ALUMINIUM FRETWORK & EAVES BRACKETS

Our range of Cast Aluminium Fretwork includes, Lace, matching Brackets, Balustrade and Palings. These products are all made to order and come in a 'raw' finish. These products can either be painted (with an oil based paint) or powder coated. If you require the fretwork to be powder coated, we are happy to provide a quote for this.
